**Brushing/Rolling Additive**

**47 444SP**

47 444SP Brushing/Rolling Additive is designed to be mixed into conventional and low VOC* Matthews Acrylic Polyurethane topcoats and clears.

47 444SP provides maximum leveling and flow characteristics when paint brush or roller application is preferred.

The special blend of ingredients allows more open time for brush workability and air release agents help alleviate bubble formation when rolling.

*Excludes MAP-LV topcoats and MAP-LVC clears.

---

**Compatible Surfaces:**

MAP Conventional and Low VOC Topcoats and Clearcoats can be brushed or rolled over properly prepared:

- 6001SP Polyester Primer Surfacer
- 6007SP 3.5 Gray Epoxy Primer
- 274 685SP U Prime
- 274 808SP Black Epoxy Primer
- 274 908SP White Epoxy Primer
- 274 528SP 2.1 VOC Gray Epoxy Primer
- 274 530SP 2.1 VOC White Epoxy Primer
- 274 531SP 2.1 VOC Black Epoxy Primer
- LVU100 Ultra Low VOC Epoxy Primer
- SMHB404A Urethane Filler
- SMP001A Epoxy Gray Primer
- SMP002A Epoxy White Primer
- Previously painted and cured finishes

---

**Associated Products:**

Matthews Acrylic Polyurethane Topcoats and Clearcoats (conventional and Low VOC)

Refer to specific Technical Data Sheets (TDS) for associated products.
47 444SP

Directions for Use

Surface Preparation:
Substrate should be prepared according to Matthews Substrate Preparation Guide prior to
topcoat application. It is necessary to prime all areas of bare substrate. Refer to specific primer
TDS for mixing instructions.
Note: For detailed preparation, priming, and painting information, refer to MPC332
Matthews Brush & Roll Process for Field Repair.

- All components should be mixed thoroughly before using
- Strain material after mixing

Pot Life: 8 hours
Pot-life is the amount of time before spray viscosity doubles. These are estimates
based on lab results at 50% relative humidity, 70°F/21°C—results will vary based
on application conditions.
Note: mix no more product than can be used within pot life.

Additives:
None

Brushes & Rollers:
Rollers:
• Should be urethane-compatible foam, velour, woven polyester, mohair, or lambs wool.
Other rollers may swell or dissolve.
• Examples:
  - 4” Whizz roller #34011 (yellow), #54011 (white w/ yellow/black stripe), #54060 (black),
    or #74011 (white and blue)
  - 4-1/2” Wooster roller #RR304 (white), #RR310 (green), or #RR311 (red)

Brushes:
• Use a china bristle or fine bristle nylon/polyester brush
Directions for Use

Application:

Apply:

- Apply 1 - 2 coats, allowing proper flash time between coats*, to achieve the recommended total dry film thickness.
- Apply coats as evenly as possible to provide a uniform appearance and coverage.
- Brush or Roll from bottom to top, then top to bottom, using a 50% overlap.
- *Allow first coat to dry to the touch before applying the second coat. Flash times will vary dependent upon film thickness, temperature, application, etc.

Estimated Drying Times:

Air-Dry @ 50% Relative Humidity, 70°F/21°C
Dry times will vary by temperature and humidity.
Dry times will increase with lower temperatures.
Refer to specific product sheets for flash, tack and dry times of all products.

Recoating: Paint films cured over 24 hours should be cleaned, lightly dry scuff sanded with 320 – 400g by hand/machine or wet sanded with 600g, then cleaned again before recoating.

Equipment Cleaning:

Clean equipment promptly with lacquer thinner or equivalent cleaning solvent.

Note: Do not leave mixed material in equipment.

Technical Data:

VOC Information (conventional topcoats and clears)
- VOC Actual RFU: 4.47 - 5.17 lbs/gal
- VOC Actual RFU: 536 - 620 g/L
- VOC Regulatory (less water less exempt) RFU: 4.47 - 5.17 lbs/gal
- VOC Regulatory (less water less exempt) RFU: 536 - 620 g/L

VOC Information (VOC and SVOC topcoats and clears)
- VOC Actual RFU: 2.34 - 3.33 lbs/gal
- VOC Actual RFU: 280 - 399 g/L
- VOC Regulatory (less water less exempt) RFU: 3.34 - 3.42 lbs/gal
- VOC Regulatory (less water less exempt) RFU: 400 - 410 g/L

Brushing/Rolling Additive

Important: The contents of this package may have to be blended with other components before the product can be used. Before opening the packages, be sure you understand the warning messages on the labels of all components, since the mixture will have the hazards of all its parts. Improper spray technique may result in a hazardous condition. Follow spray equipment manufacturer’s instructions to prevent personal injury or fire. Follow directions for respirator use. Wear eye and skin protection. Observe all applicable precautions.

See Safety Data Sheet and Labels for additional safety information and handling instructions.
